SUMMARY

Aspiring IT professional with experience in AI, machine learning, and web development. Skilled in Python, NLP, Flask, and deep learning frameworks. Developed projects in AI mock interviewer, resume analysis, and stock trend predictor. Completed virtual internships at AWS and Gemini Gen AI. Strong problem-solving and analytical abilities.

Education

Kalinga Institute of Industrial Technology

Bachelor of Technology in Information Technology—CGPA 8.75

Sep. 2022 – May 2026

Bhubaneswar, Odisha

Delhi Public School

Intermediate

2019 – 2021

Begusarai, Bihar

St paul's school

Matriculation

2007 – 2019

Begusarai, Bihar

Technical Skills

Languages: Python, Java, C, SQL, Linux, JavaScript

Tools: Git, GitHub, VS Code, Jupyter, Gitlab.

Technologies/Frameworks: Linux, Tensorflow, keras, PyTorch, flask, Computer Vision, AWS Cloud, Generative AI, MLOps, DevOps (Docker, Kubernetes, Apache Kafka, Kafka Streams.), Software Engineering, HTML, CSS, Operating Systems, SSE, Spring boot, LLM, Agentic ai, Hadoop, Oracle, Power BI, Databricks

Experience

DELL Technologies | *Docker, Kubernetes, Apache kafka, gitlab, CI/CD, Agentic AI*

May 2025 - July 2025

- Built a Kafka-based real-time data pipeline with Section-wise aggregation using **Kafka Streams** and **Spring Boot**
- Assisting in the automation and optimization of CI/CD pipelines using tools like **Jenkins** and **Git**.
- Supporting containerized deployments using **Docker** and orchestrating environments with **Kubernetes**.
- Gained hands-on exposure to **Agentic AI** concepts while working on projects

Projects

AI JOB ASSISTANT | *React, Flask, Agentic AI, NLP, LLMs*

August 2025

- Developed a web-based AI Job Assistant integrating multiple modules including resume analyzer, AI interviewer, job finder, coding practice, and email generator.
- Implemented Agentic AI workflows and NLP techniques to enable autonomous decision-making, resume parsing, and personalized job recommendations.
- Built an interactive frontend with React and integrated it with Flask backend APIs for real-time AI-driven responses..

AI-MOCK INTERVIEWER | *Flask, Deep Learning, Speech Emotion Recognition*

March 2024

- Built an AI-driven app to conduct technical and behavioral interviews, fetch company-specific questions, and detect user emotions (e.g., nervousness) from facial features and voice using deep learning models.
- Developed an AI-powered resume evaluation system that analyzes resumes against job descriptions to generate ATS.
- Implemented NLP techniques to extract key skills, experience, and keywords, ensuring alignment with job requirements.

Chaotic Whispers: Deep Learning for Stock Trend Prediction | *NLP, Agentic AI, HAN, LSTM*

November 2024

- Deep learning framework that predicts stock trends by analyzing news sentiment and financial data.
- Implemented LSTM and Transformer-based models to capture complex market dynamics and trends.

Document Query Chatbot | *Python, Streamlit, Faiss, Gemini LangChain,*

October 2024

- Developed a web application allowing users to upload PDF, Word, and Excel files and interact with a chatbot that answers queries based on document content.
- Used Faiss and LangChain for document parsing and querying with open-source LLMs, and built a Streamlit backend with a dynamic frontend for model selection and chat visualization.

Extracurricular

NSS

Spring 2022 – Present

Core Member

- Member, NSS The NSS, or National Service Scheme, is a fantastic program in India that allows students to contribute to their communities through voluntary service. I'm passionate about giving back to the community and believe in the NSS's motto, 'Not me, but you'
